DEVELOPMENT PROGRESS (8 WEEKS)

1

PHASE 1

Discovery & Audit
Weeks 1–2

2

PHASE 2

System & Content
Weeks 3–4

3

PHASE 3

Prototype & Integrate
Weeks 5–6

4

PHASE 4

Test & Launch Prep
Weeks 7–8

ITERATIONS

BEFORE

Cluttered layout.
Hard to navigate.

AFTER

Cleaner flows.
Stronger hierarchy.

FINAL

Unified experience.
Engaging hunt.

RESULTS

36

Projects showcased
across campus.

6

Rooms & venues
connected.

1

Unified experience
for all audiences.

CODE

- Semantic HTML
- Modular CSS
- Vanilla JS

COLORS

- Design tokens
- Accessible contrast
- Consistent themes

TYPE

- Norwester for headlines
- Avenir Next for body
- Clear hierarchy

GIT

- Feature branches
- Clear commits
- PR reviews

QA

- Cross-device test
- Accessibility check
- Performance check

ASSETS

- Optimized images
- SVG icons
- Organized files

IMM SENIOR SHOW 2026

A campus-scale interactive exhibition platform blending wayfinding, project storytelling, and scavenger-style engagement into one seamless experience.

EXPLORE. DISCOVER. ENGAGE.

TEAM

IMM Design & Development
Team (6 Students)

AUDIENCE

Students, Faculty, Families,
Alumni, Industry

DELIVERABLES

Web Experience + QR Hunt
Print Collateral + Digital Assets

SCOPE

Cross-campus exhibition
experience and engagement

WHY THIS MATTERED

THE PROBLEM

- Discovery was hard across venues.
- Visitors needed faster orientation.
- Branding and messaging varied.
- Engagement lacked consistency across touchpoints.

THE GOAL

- Build a cohesive, easy-to-use experience.
- Improve browsing and wayfinding.
- Drive playful exploration with a QR hunt.
- Support desktop, mobile, and print materials.

THE PROCESS

1

RESEARCH

Interviews, content audit, benchmarks, and user needs.

2

DEFINE

Information architecture, user flows, and content strategy.

3

DESIGN

UI patterns, components, wireframes, and visual system.

4

BUILD & TEST

Prototype, interactions, QA, and iteration with user feedback.

DEVELOPMENT PROGRESS

1

DISCOVERY + CONTENT AUDIT

Mapped venues, collected project data, and identified user needs.

2

VISUAL SYSTEM DEFINITION

Defined brand, typography, color, components, and navigation patterns.

3

PROTOTYPE + INTERACTION BUILD

Built responsive prototype with map, directory, and QR hunt interactions.

4

QA + LAUNCH PREP

Tested across devices, refined experiences, and prepared assets for launch.

ITERATION COMPARISON

BEFORE

- Cluttered layout
- Hard to navigate
- Inconsistent brand

AFTER

- Cleaner hierarchy
- Improved navigation
- Stronger visual system

FINAL

- Unified experience
- Intuitive wayfinding
- Engaging QR hunt

FINAL SOLUTION

HOMEPAGE

Bold entry with key actions, featured projects, and events.

DIRECTORY

Browse and filter projects with search and categories.

MAP

Interactive campus map with venues, amenities, and routing.

HUNT MODULE

Scavenger-style QR hunt that drives exploration and rewards.

RESULTS

36

Student Projects
Showcased across
campus venues.

6

Unified Modules
Working together
seamlessly.

Connected System
Web + Print + IRL
unified experience.

LEARNINGS

- Early content audits save time and improve information architecture.
- A strong visual system builds trust and clarity across channels.
- Playful interactions (like QR hunts) drive engagement and exploration.

NEXT STEPS

- Add analytics dashboard to track engagement and popular routes.
- Expand accessibility features based on user feedback.
- Prepare V2 enhancements and extended content integrations.

EXPLORE THE EXPERIENCE

LIVE PROTOTYPE

NEXT CREW HANDOFF

BRANDKIT

Assets, tokens, components
ready for consistent use.

CODE INJECTS

Reusable components
and interaction library.

QA

Test plans, issues log,
and device matrix.

SQUARESPACE

Content structure,
CMS guides, templates.

NEXT CREW,
YOUR ADVENTURE
CONTINUES.

A unified system of color, type, and components ensures consistency, accessibility, and a recognizable brand across every touchpoint.

LOGO ITERATIONS

PROBLEM

- Discoverability and navigation were inconsistent.
- Branding and messaging lacked cohesion across channels.
- Maintaining and iterating the site was inefficient.

GOAL

- Create a consistent brand system and scalable UI.
- Improve discovery and engagement across campus.
- Build a clear handoff and workflow for future teams.

RESULTS

36 Projects Showcased
6 Venue Areas Connected
1 Unified System for Future Crews

PROCESS

DEVELOPMENT PROGRESS — 8 WEEKS
